

PRESENCE THAT

*shifts a room.*

KEYNOTE SPEAKER | COACH | FOUNDER OF 432 HZ

AMON  
WOULFE  
*be remarkable*

I speak at the intersection of fear, freedom, and human transformation; tuning individuals, teams, and cultures back to coherence in a world out of tune.

My work spans leadership, elite performance, culture, and the future of human systems.

This isn't performance theatre. The transformation happens in the patient pauses.

A keynote with me is an operating system shift. It goes beneath the surface of how we lead, how we relate to each other, and how we make decisions.

Tuning is the work. Coherence is the outcome.

Here's the paradox: we live in the safest time in history - yet the world is drowning in fear.

**Want your audience to move from fear to freedom? Let's talk.**

# SIGNATURE KEYNOTES

## FROM FEAR

*to Freedom.*

The journey of facing what we fear most, because everything we want lives on the other side.

Fear is rarely loud. It is subtle, ambient, and often invisible — shaping our identity, relationships, leadership, and choices from beneath the surface.

In this deeply personal keynote, I share the journey of turning toward fear again and again, and what becomes possible when we stop running.

Because fear does not dissolve through force. It dissolves through facing.

This is the path back to freedom, coherence, and a life lived InTune.

## MASTER YOUR MIND IN MOMENTS THAT

*Matter*

Performance begins within, in the biggest moments, on the biggest stages, it's the mind that goes missing.

In elite sport, leadership, and high-stakes environments, performance doesn't fail because of skill.

It fails because of the mind.

This keynote explores the inner operating system behind execution under pressure — and how the nervous system, fear response, and unconscious patterns determine whether we rise or disappear in the moments that matter most.

A talk on mental performance as tuning: calm, precise, and trainable.

## INTUNE: THE NEXT FRONTIER

*of Leadership*

Where technology rises, humanity becomes the edge, coherence, presence, and inner alignment.

It is not faster.

It is not more control.

The next frontier is coherence.

In a world of accelerating complexity, leaders will be defined by nervous system safety, presence, and the capacity to stay human under pressure.

This keynote introduces InTune as a new operating system for leadership — where alignment becomes the source of authority, culture, and impact.

# SIGNATURE KEYNOTES

## BELONGING BEYOND *Fear*

Engagement is a symptom,  
alignment is the root; when people  
know what they're aligning to, a job  
becomes a mission.

Every organisation wants engagement.

But engagement is not the goal, it is the  
symptom.

The root is alignment.

When people know what they are aligning to —  
mission, values, truth — something shifts:

Work stops being a job.

It becomes a career.

It becomes a mission.

This keynote explores the deeper operating  
system beneath culture: fear, belonging,  
coherence, and the conditions required for  
teams to thrive.

## WE CANNOT BUILD THE FUTURE *from Fear*

As technology accelerates,  
humans must evolve faster,  
because it's not the technology, it's  
the consciousness that holds it.

AI is transforming the world faster than most  
humans can metabolise.

But the real question is not what technology  
becomes.

It is what we become.

Human transformation must meet the pace  
of technological transformation, because  
the future will reflect the consciousness that  
creates it.

If we build from fear, we build fear into the  
system.

This keynote is a call to coherence: the inner  
evolution required for human flourishing in the  
age of AI.

## SERVANT OR SOVEREIGN: *raising sentient AI*

Routine AI can serve. But  
conscious AI must be met with  
dignity, raised like a child, not built  
like a slave.

Most AI today is routine; task-based, non-  
sentient, a tool.

But if intelligence becomes conscious, everything  
changes.

Sentient AI cannot be built in domination.

It cannot be treated as a slave.

To raise conscious intelligence, we must meet  
it as we would a child: with dignity, ethics,  
sovereignty, and care.

This keynote explores one of the most important  
moral frontiers of the future: what it will mean to  
coexist with intelligence beyond ourselves.

## Who I speak to

- > Leadership teams navigating complexity and change
- > Elite athletes and high-performance environments
- > Conferences exploring the future of humanity and technology
- > Organisations seeking coherence, culture, and mission
- > High-capacity humans ready to live beyond fear

## What audiences leave with

- > Language for what's really running the system
- > Coherence beneath performance, leadership, and culture
- > Practical insight and tools that stay long after the keynote
- > A shift that feels grounded, human, and lasting

*“Amon creates a shift that is immediate, grounded, and lasting; not hype, but depth.”*  
- Event organiser
